Access global markets with a trusted one-stop partner

Telecommunications solutions that ensure quality, safety and reliability
The world is experiencing a revolution in wireless communication. New mobile technologies are achieving faster download speeds, making the Internet increasingly portable. As radio modules become more affordable, a growing number of devices and appliances throughout our homes, cars and workplaces are now equipped with wireless/radio technology. To capitalise on this growth, manufacturers and suppliers must conform to complex regulatory requirements, both national and international. Cost and time to market are also issues, with pricing pressure and timescales for design, testing and certification all being compressed in response to market demands. It’s vital to instil confidence in importers, retailers and end users that your products are safe, reliable and market compliant.

TÜV SÜD BABT is one of the world’s leading independent Certification Bodies for Telecommunications. We have experts with specialist knowledge in key industries including marine, aviation, defence, electronic consumer products, and communication technology infrastructure and equipment. To support your worldwide operations, local TÜV SÜD BABT technical certifiers provide experts who explain regulatory certification requirements in your language. Our broad range of services enables one-stop testing and certification of all your wireless communication products, from determining your customers’ requirements and reviewing designs to providing information about your products’ usability and ensuring they comply with relevant national and international standards.

Ensure your products conform to international regulations

Achieve fast market access anywhere in the world

The telecommunications industry is extremely competitive, with new technologies developing rapidly worldwide and customers demanding high quality. TÜV SÜD has the expertise and experience to help you remain competitive in this fast-moving sector. We provide a one-stop solution comprising expert knowledge, evaluation, testing and certification services. This ensures that your telecommunications and wireless communication products conform to the compliance requirements of your intended market. Wherever you operate, we have international industry experts placed locally, ready to support you in achieving a global competitive advantage.
End-to-end services for fast, efficient market access

For more than 50 years, TÜV SÜD has helped manufacturers meet deadlines by providing fast, reliable market access. We are a leading radio and telecoms Notified Body. Our experts’ comprehensive knowledge of laws and standards ensures you receive all necessary certificates, tests and permissions in due time. From review and evaluation to testing and certification, our complete range of services covers a wide variety of telecoms, marine, payment and other products.

Global recognition
TÜV SÜD BABT is one of the world’s leading Certification Bodies for Telecommunications, having been founded as BABT in 1982 at the dawn of the telecommunications revolution.

World-class expertise
We offer you world-class insights, intelligence and expertise on a local, regional and global scale, backed by many years of experience. Some of TÜV SÜD’s experts have been assessing telecoms products since 1982.

Latest knowledge
Our international and local experts in all key markets worldwide regularly undergo intense in-house training programmes to keep them up to date with the latest standards and regulations.

Niche sectors
We have in-depth knowledge in niche areas such as Automatic Identification System (AIS) testing in the marine sector, wireless card payments, and international search and rescue beacons.

Independent and impartial
Our structure enables us to focus on enhancing the value we bring to you. We reinvest our profits back into the company to ensure continual development and optimisation of expertise and resources.

Value-added services
We view your operation in its entirety and offer holistic solutions to optimise the potential of your business. By pinpointing areas for optimisation, we enable you to ensure that your business operation is running at maximum reliability, efficiency and safety.

Ensuring worldwide access
TÜV SÜD’s global telecommunications network

Your business benefits

Save money – Through our dedicated team of experts who are committed to increasing reliability, efficiency and adding tangible economic value to your operations.

Save time – By working with us in a partnership that supports the entire product lifecycle, from the initial planning through design to operation and maintenance.

Minimise risk – Test reports and certificates issued by TÜV SÜD are globally respected and recognised as a sure sign of reliability and trust among authorities, network operators and customers.

Competitive edge – Gain insight and foresight about national and international standard developments through our experts’ participation in standardisation committees.

Expert service – Our full range of service across the global telecommunications value chain gives you the assurance and convenience of working with a trusted, reliable and independent single-source provider.

Global support – Tap into a reliable network of international and local experts in all key markets worldwide, providing you with global knowledge of processes and procedures in telecommunications services.

Total transparency – Ensure your necessary compliance to all international and national standards is achieved cost efficiently with our proactive, pragmatic approach.
