## Produced Water Workshop 2019

### Call for Abstracts

11-12 June 2019  
Aberdeen

## About the Workshop

Building on TUV SUD NEL's successful workshops relating to produced water management and oil-in-water measurement over the last 19 years, TUV SUD NEL is now planning its 17th Produced Water Workshop to be held in Aberdeen on 11-12 June 2019.

The objective of the Workshop is for interested parties to find out and keep abreast of the latest technological and legislative developments, as well as current practices and trends in produced water management, treatment and handling.

With the continued recovery of the oil price it is important to manage produced water optimally to maximise oil production and to keep the costs under control.

The event is designed for those who are interested in produced water treatment, management and handling. We now invite regulators, offshore operators, service companies, technology and equipment suppliers as well as consultancy and R&D organisations to submit abstracts.

## Submission of Abstracts

If you are interested in presenting at this event, please submit a presentation title, author(s) details (if more than one author, please highlight the presenting author), and an abstract of around 150 to 200 words by 4 February 2019 for review.

Authors of accepted abstracts will be expected to attend the Workshop and deliver a presentation. Registration fees for the presenting author will be waived.

## Topics

As a guide, abstracts are invited from the following areas:

- Regulatory requirements and updates
- Risk-based approach (RBA) implementation
- Field operational experiences
- New treatment technologies
- Chemical EORs and produced water handling
- Produced water re-injection
- Production chemicals and produced water treatment
- Produced water handling on an unmanned installation
- Subsea separation
- Oil in produced water measurement
- Use of online oil-in-water monitors for reporting
- Oil sheen formation and mitigation

Areas other than those listed that are related to produced water shall also be considered.

## Submission Deadline: 4 February 2019

**Abstract Submission:** 4 February 2019

**Notification of Acceptance:** 18 February 2019

**Receipt of Extended Abstract/Paper & Speaker Bio:**

28 May 2019

**Receipt of Presentation:**
